SUMMARY

Senior Interaction Designer with **8+ years** of experience in **interaction design**, **design systems**, and **accessibility** for enterprise applications across finance, healthcare, and content services. Known for translating complex workflows into scalable, accessible experiences by applying **design thinking methodologies** through user research, problem framing, ideation, prototyping, validation, and iterative refinement. Leverages **AI** to assist with discovery, concept exploration, rapid prototyping, usability evaluation, and research synthesis while partnering closely with product, engineering, and QA to deliver user-centered solutions.

EXPERIENCE

● **Senior Interaction Designer**, OpenText, Bengaluru (Hybrid) May 2024 – Mar 2026

Content Services — Vendor Invoice Management, Core Signature

- Reimagined **Vendor Invoice Management** under the *One Invoice* initiative — restructuring dense, multi-step invoice workflows around **SAP Fiori** patterns so **Accounts Payable** users complete tasks in fewer steps and with less confusion.
- Simplified data-heavy enterprise screens using deep Accounts Payable and SAP GUI knowledge, cutting visual clutter and reducing the effort required to process invoices.
- Redesigned **Core Signature's** e-signature flow, identifying and removing friction points to make signing faster and more intuitive.
- Owned UX discovery, prototyping, and usability validation end-to-end, grounding decisions in evidence so releases landed closer to real user needs.
- Partnered with Product, Engineering, QA, and Accessibility teams to keep handoffs smooth, and ran UX audits that drove consistency and cut UX debt.
- Contributed to OpenText's **Extended ECM for Salesforce**, using the **Lightning Design System** to refine workflows and patterns for greater consistency and usability across content-management experiences.

● **Lead / Senior UI UX Designer**, Indegene (Remote) Jun 2021 – May 2024

Healthcare & pharmaceutical R&D services

- Became the in-house **design token strategist** and led the implementation of design tokens for **GSK**, building a scalable design system with guidelines, documentation, a Figma UI library, and production-ready React components.
- Adopted by **23 global agencies**, the system enabled faster design workflows, seamless brand and colour-theme switching, consistent cross-platform experiences, and significantly reduced development effort and cost.
- Built a multi-brand design system spanning **8 brands** (each with its own guidelines) for **Vifor**, then led its migration to a refreshed brand identity with minimal disruption.
- Delivered a **multi-brand** design system and Figma UI library for **Incyte Pharmaceuticals**, giving designers reusable components that sped delivery and kept experiences consistent.
- Designed pharma-specific UI components and websites focused on clarity and usability; promoted to Lead, setting design direction and mentoring designers.

● **Visual Designer**, Safehalo Products, Bengaluru (Hybrid) Nov 2017 – Jun 2021

AI solutions for safer, smarter living

- Led brand development across digital and print, creating a cohesive visual identity through the company website, marketing collateral, and brand assets.
- Partnered closely with stakeholders to gather requirements and align on business goals, championing the value of design thinking methods to shape stronger solutions.
- Conducted field studies and user research to uncover insights, applying design thinking methods (Double Diamond) to define problems, explore solutions, and validate concepts.

● **Visual Designer**, Harman Connected Services (Aditi Technologies) Jan 2014 – May 2015

Bengaluru, India

- Assisted senior designers in delivering web-based application and visual design projects.
- Contributed to user research, information architecture, and user journey mapping to support the UX process.
- Created UI components, icons, and visual assets for large-scale web applications, helping build consistent user interfaces.
- Designed pre-sales presentations, concept visuals, and supporting marketing collateral for client engagements.
- Produced interface designs and graphics using Adobe Photoshop, Illustrator, and InDesign.
- Collaborated with cross-functional teams while building a strong foundation in user-centred design and industry best practices.

● **Graphic Designer**, Wipro Technologies, Bengaluru Jun 2013 – Jan 2014

- Created graphic and marketing design assets while maintaining strong visual and brand consistency.

EDUCATION

- Master of Fine Arts (MFA)

Fine Arts

Bangalore University
Bengaluru, India
- Bachelor of Visual Arts (BVA)

Visual Arts

CKP, Bangalore University
Bengaluru, India

SKILLS

Interaction Design	Expert	Figma / FigJam	Expert
Design Systems	Expert	Figma Make	Proficient
Design Tokens & Theming	Expert	Accessibility (WCAG 2.1 / 2.2)	Continually Learning
Prototyping & Wireframing	Expert	Visual & UI Design	Expert
User Research	Proficient	Information Architecture	Advanced
Usability Testing	Proficient	SAP Fiori / Enterprise UX	Advanced
AI Agents & Claude Tooling	Advanced	Code-First Systems (Node.js / Tailwind)	Proficient
